18 **Tools for Reducing Meetings**

 Video - 04:57 mins - Resources (1)

19 20@10 Standup as a Tool

 Video - 05:12 mins - Resources (1)

20 Agile as a Tool

 Video - 05:35 mins - Resources (2)

Day 2: Management and Leadership

10/06/2020

→ Learning to lead:
Learning to lead is specifically for people who are about to move from the individual contributor status to a position of managing others for the first time or who have made this transition within the last two years.

Tools for leading teams

- Giving feedback by SBI tool
- people process and Tools
- Tools for reducing meetings
- Standup as a Tool
- Agile as a Tool
- Retro as a Tool
- Agile Manifesto as a Tool

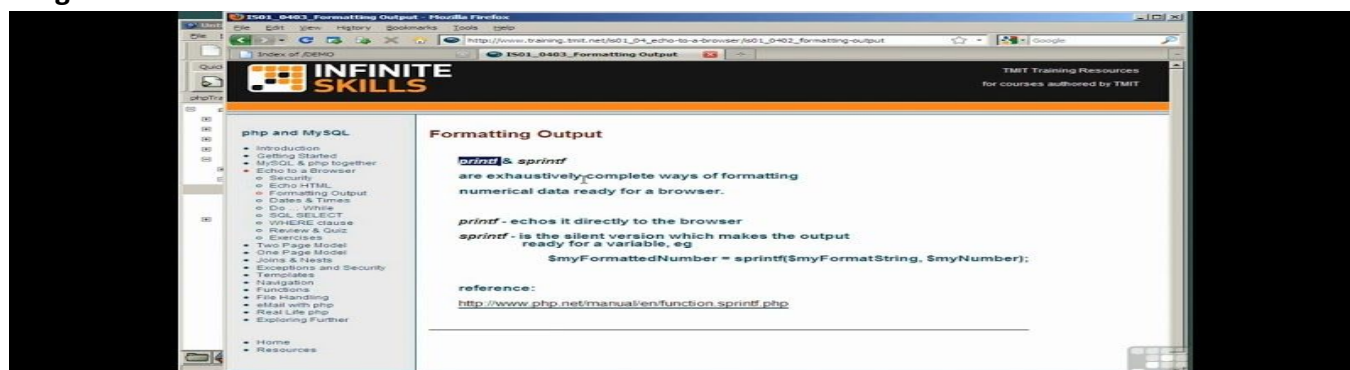

Focus on the Big Rocks

- Big Rocks are our priorities
- They are the tasks, projects, or goals we absolutely accomplish
- They are our mission critical objectives not items on a messy, sprawling to do list
- people tend to run into those problems when they think about their priorities
- * They have too many priorities
- * They do not or cannot differentiate the truly important priorities.

Section 4 - Outputting And Processing Data

43 Hiding Sensitive Data

Video - 01:57 mins

44 Including Sensitive Data

Video - 04:04 mins

45 PHP Echo And Quotes - Part 1

Video - 05:13 mins

46 PHP Echo And Quotes - Part 2

Video - 04:53 mins

47 **Formatting Using sprintf**

Video - 05:49 mins

48 **Outputting Tabular Data**

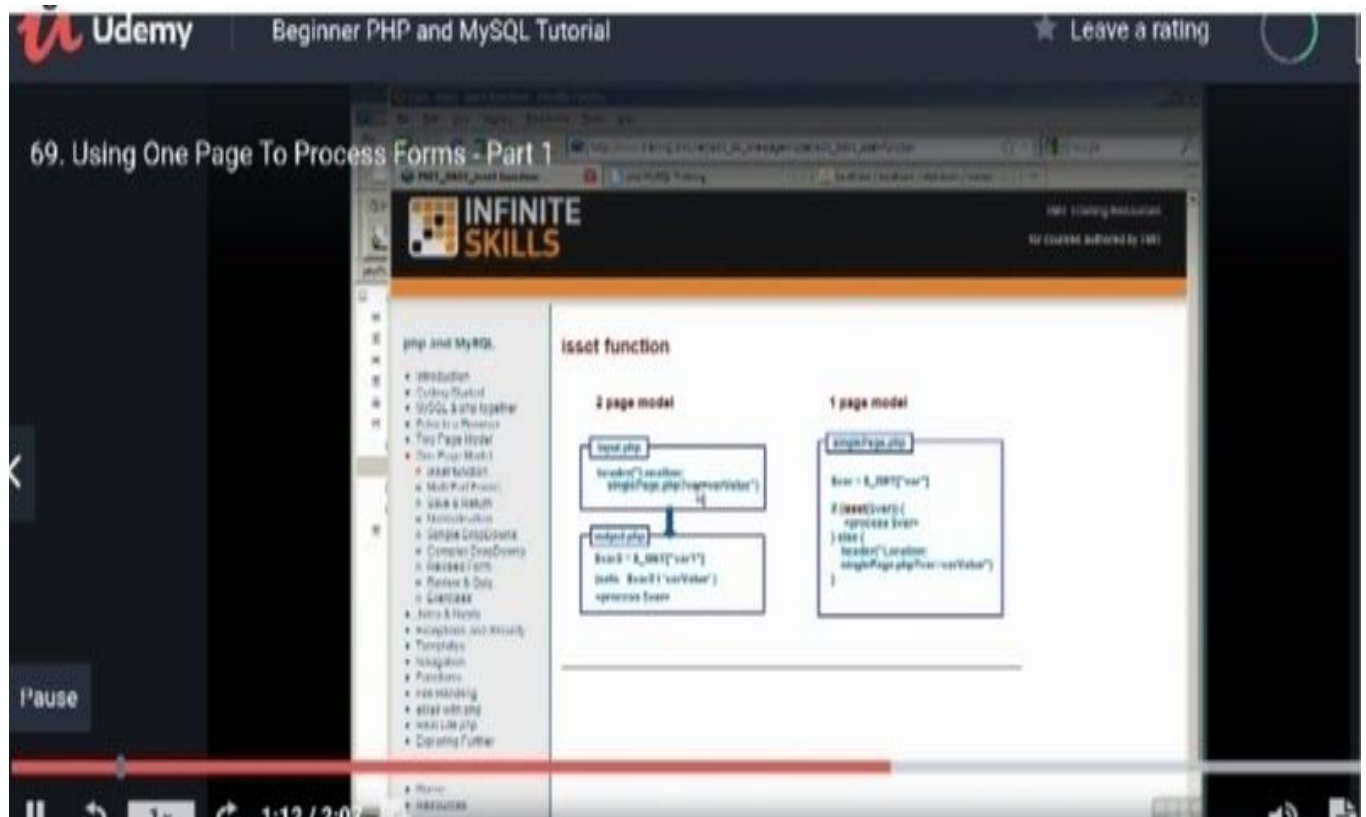

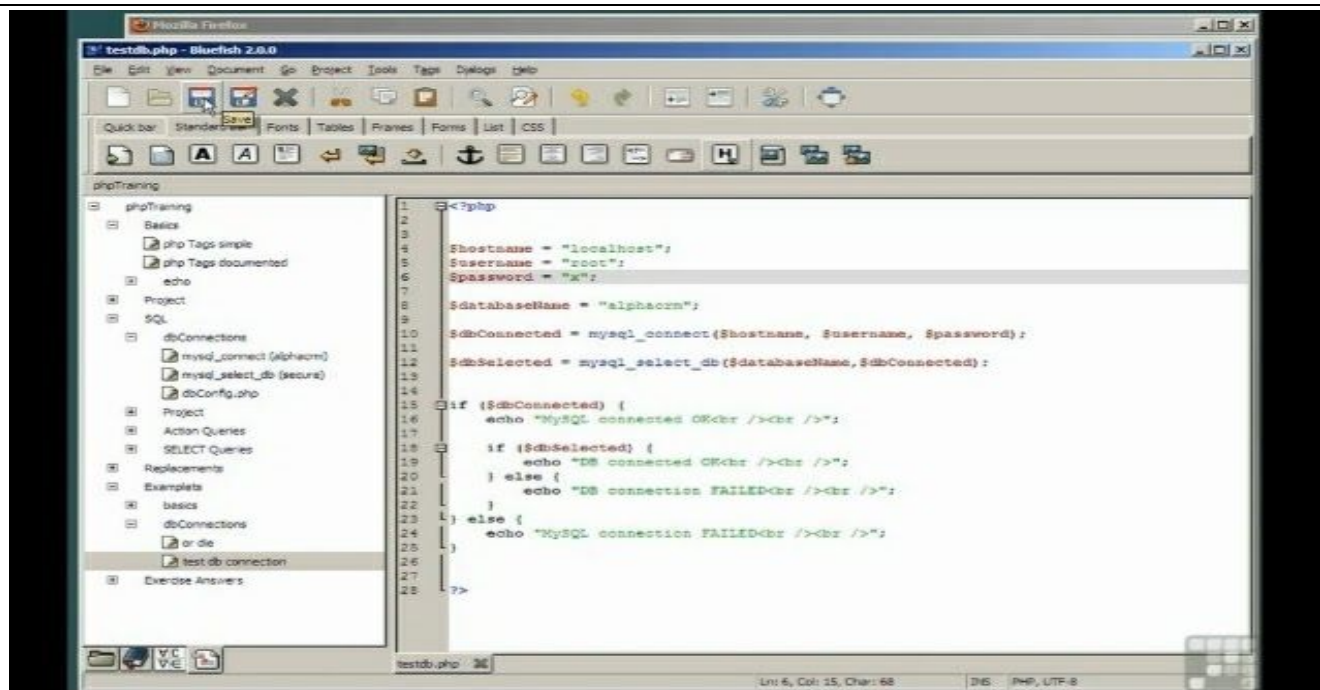

Video - 04:58 mins

49 **Outputting Data And Time**

Video - 05:31 mins

Report – Report can be typed or hand written for up to two pages.

- 10/06/2020

MySQL

Day-2

§ outputting and processing data

Hiding Sensitive Data's

- * use Echo to display content in a browser
- * use escaped characters
- * format output with printf
- * discover superlative control constructs
→ while, do while, for, for each

Formatting output

- * printf and sprintf
→ are exhaustively complete ways of formatting numbers
data ready for a browser

· outputting Dates and time

- Dates and times
- Dates are stored in MySQL in the form
YYYY-MM-dd or YYYY-MM-dd HH:MM:SS

§ Dealing with Variables

Intro to Sending Variables

FORMS - the two page Model

- The '2 page Model' is where we create two pages
- * The first, a script to allow the user to enter data
- * another to collect the data entered and use it

§ Inserting and using Database data

- * one page Model

The '1 page Model' is
a cleaner more elegant solution than the 2 page model

- use the Set function to test if a variable value is
- create a Simple (Single value) dropdown Selection box
- create a Key and Value Selection box.
